Education

D.Y. Patil School of Engineering and Technology, Pune

August 2021 - June 2025

Bachelor of Technology in Computer Science Engineering (CGPA 8.88)

Ambi, Pune

Relevant Coursework: *Data Structure & Algorithms, Object Oriented Programming, Computer Networking, Database, Operating System.*

Work Experience

Software Development Intern - Zidio Development

August 2024 - Oct 2024

- Developing and maintaining responsive web applications, ensuring alignment with project requirements and timelines and look-up for the APIs call.
- Applying best practices in coding and design to enhance performance and user experience.

Web Developer Intern - Suven Consultants and Technology Pvt. Ltd.

July 2023 - August 2023

- I engineered responsive web applications, collaborating with cross-functional teams to ensure optimal delivery.
- I adhered to industry best practices, resolving technical issues efficiently and improving application load times by **20%**.

Projects

Weather App | *Context HTML, CSS, API, JavaScript* | [GitHub Link](#)

December 2024

- Built a responsive weather app using HTML, CSS, and JavaScript, integrating the Open-Meteo API for real-time weather data based on user input.
- Implemented form validation, error handling, and a mobile-friendly UI to ensure a smooth and consistent user experience.
- Demonstrated skills in API integration, asynchronous JavaScript (fetch, async/await), and modular code structure with Git-based version control.

Hd Notes | *Context HTML, CSS, JavaScript, React.js, MongoDB* | [GitHub Link](#)

May 2025

- Developed a modern, responsive notes application using React.js, featuring emoji support, tag-based filtering, and a clean, user-friendly interface.
- Designed interactive UI components and managed application state to enable smooth note creation, editing, and real-time filtering of content.
- Built a responsive React frontend with component-based architecture, supporting real-time note editing, image previews, and mobile-first design.

Zerodha Clone | *Context HTML, CSS, JavaScript, React.js + Vite* | [GitHub Link](#)

July 2025

- Built a fully responsive Zerodha landing page clone using React + Vite, HTML, and pure CSS, replicating the official UI for educational purposes.
- Implemented client-side routing with react-router-dom to enable smooth navigation between static pages such as Home, About, Pricing, Login, and Signup.
- Organized code with a modular component structure, focusing on clean layout replication, responsiveness, and mobile-first design principles without using any CSS frameworks.

Technical Skills

Languages: Java, C, JavaScript (ES6+)

Frontend: Html, CSS/Bootstrap/Tailwind, React.js

Database: MongoDB, MySQL

Tools & Platforms: Git/GitHub, Postman, Render
